Naval Architect: Hans Jørgen Johnsen						

Windy Boats AS undergoes a continuous process of renewal, development and amendments to standard specifications of its products. Specifications presented in this document may be changed without prior notice.

All our models are CE-labelled. This means that Windy meets all the requirements laid down for quality control, documentation and product liability within the EU. In the process of obtaining approval, the company has also introduced new methodologies, construction principles and more advanced production equipment, resulting in more cost-effective and quality-oriented processes in-house. But above all, Windy is a "boat-builder" and not a "manufacturer" of boats, a philosophy which characterises our production staff, our service staff and all those in our distribution network.

Windy is the product of traditional craftsmanship, enhanced with the aid of modern technology. The latest technological innovation is the WinTec concept, which gives the hull improved performance, greater strength and reduced noise. The hull is reinforced with advanced multiaxial glass fibre matting and Divinycell®. This allows a reduction in the boat's weight of up to 20%, while offering noticeably improved stability. WinTec is a standard feature of our latest models.
